

# ServoMaster<sup>Touch</sup>

## Plug-n-Run Controls

www.cpec.com

COE's ServoMaster Touch™ controls are designed to be quickly implemented into existing lines. Whether the original equipment is COE or produced by another manufacturer, COE's ServoMaster comes complete with everything necessary for a weekend upgrade. Six different drive sizes are available to meet varying torque and speed requirements for servo feeds up to 8" in diameter and 78" in width.

The ServoMaster Touch controller can integrate with press controls to provide a complete and compact controls system with "single point entry" for all job specific parameters. Interfaces are available for Wintriss, Link Systems, and many others.

### Standard Package

- User-friendly VGA color touchscreen interface
- Customizable operator screens
- Free-standing operator station
- 10-foot pre-wired cable set
  - Brushless AC servo motor
  - Remote jog pendant
  - Installation schematics

### Advantages

- "Feed Advisor" feature to calculate job set-ups
- "On the Fly" feed length micro adjustment
  - 500-job memory storage
    - Inch or metric programming
    - Serial communications capability
    - Password protected parameters
    - English or Spanish language
    - Step-programmable option
  - Batch controller with output
- Feed interrupt-continue feature

#### Compact Footprint

The controls console is compact and can be floor- or remote-mounted, taking up little space.

#### Fully Accessible

Top deck and facing doors are lockable and interlocked for safe, secure and complete access.

#### Complete Drive Package

Robust Yaskawa drives tuned and ready to run right out of the box. You'll be up and running in hours.

#### Motor and Cables

Complete Plug-n-Run package includes motor and a complete set of power and control cables.

#### Touchscreen

User-friendly 5.7" VGA color touchscreen with customizable operator screens.

## The Company that Feeds an Industry

COE Press Equipment designs and manufactures a complete line of premiere coil handling and servo roll feed equipment from stand-alone roll feeds, straighteners, reels, cradles and air feeds to complete integrated feed line systems. The company supplies and services a wide variety of global markets and industries including automotive, appliance, lighting, metal processing, housewares, lawn and garden, contract stampers, tool and die builders, and many others.

COE provides one-stop shop capability starting with its top-notch engineering staff focused on R&D right through to fabrication, CNC machining, assembly, paint and electrical. This vertically integrated approach has led the company into developing its own line of servo feed controls, as well as customized packages and complete automated feed lines of the highest quality.

Founded in 1976, COE has a tradition of focusing on customer service first, ensuring the development and delivery of coil feeding equipment and systems in a timely manner, and best-suited to each company's particular need. For a complete list of satisfied customers or more information on our various product offerings, just visit [www.cpec.com](http://www.cpec.com) or contact your nearest COE representative, serving the United States, Canada and Mexico.
