## *Shaping the Future of the Metalforming Industry*

**Future  Products**  
TOOL CORPORATION

*Manufacturing Precision Interchangeable Die Components*

7200 Interstate 20 Kennedale TX, 76060

Specializing in the  
Manufacturing of  
Precision  
Interchangeable Die  
Components

Industries Served

- w Automotive
- w Appliance
- w Can Tooling
- w Hardware
- w Hand Tools
- w Office Furniture
- w Lighting
- w HVAC
- w Electrical
- w Electronics
- w Medical

Segments Served

- w Metal Stamping
- w Powder Metal
- w Forging
- w Fine Blanking
- w Hydro Forming
- w Flow Forming
- w Hot & Cold Metal Forming
- w Draw Forming

Special Precision  
Tooling

- w Punches
- w Buttons
- w Retainers
- w Die details

## World-Class Precision Tooling

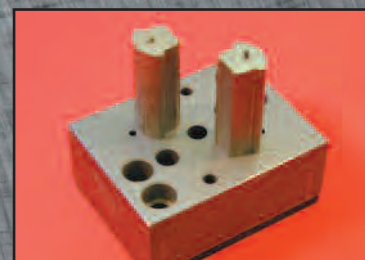

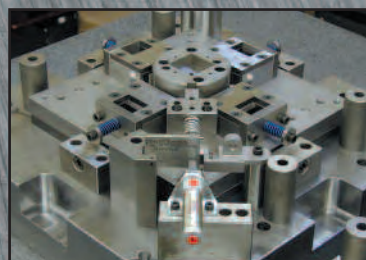

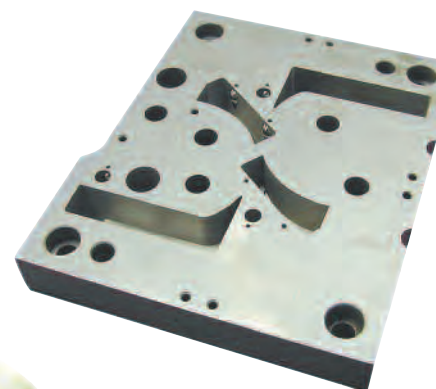

Founded in 1963, Future Products Tool Corporation has established itself as a world-class quality supplier to the metalforming industry.

Future Products continues to meet the demands of today's ever changing global market by combining the latest resources available in CNC equipment, highly skilled tool makers, responsive customer service and creative innovations to deliver world-class products.

Our customers range in size from small regional manufacturers to Fortune 500 companies. Large or

small, simple or complex tooling requirements, our commitment to producing unprecedented service and quality to customers is our number one priority.

Because of Future Products experience in serving such a diverse range of customers and industries, we are able to leverage the knowledge and expertise gained in one industry to benefit another.

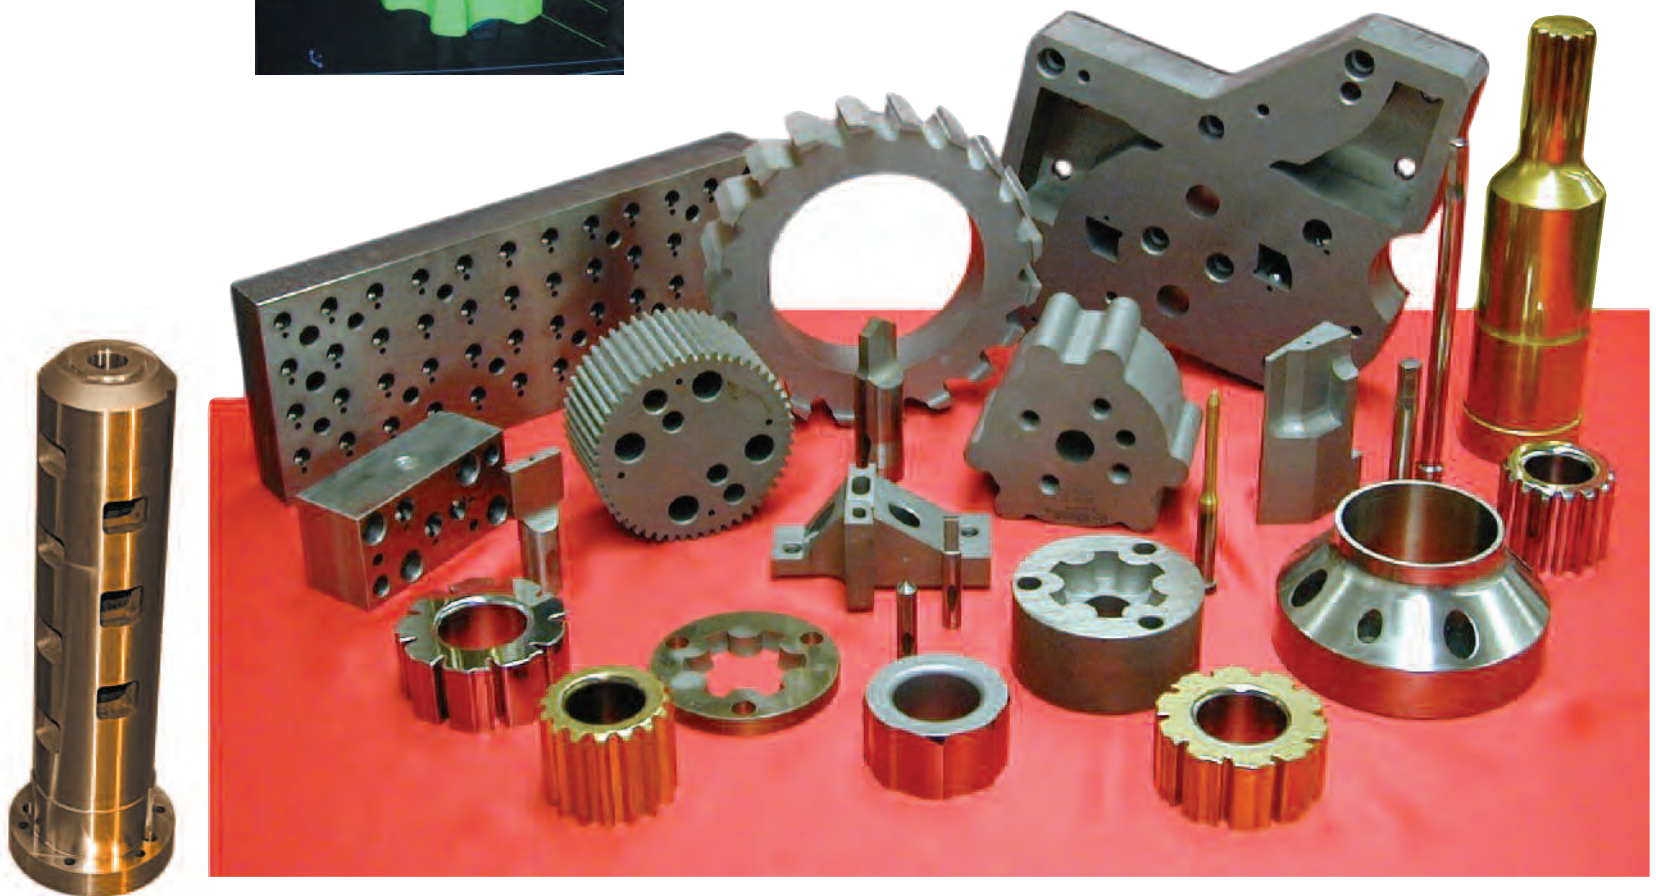

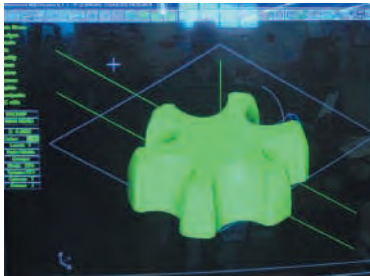

## Advanced Manufacturing

When you select Future Products for your tooling needs, you receive precision interchangeable die components manufactured to your exact finished dimensions, with the ability to hold dimensional integrity to within  $\pm .0001$ . All tools are produced directly

from blueprints so replacements accurately duplicate the originals.

Future Products use of the most advanced software and CNC equipment ensures consistent quality in manufacturing precision components.

From analyzing CAD data through final inspection, our processes are continuously monitored and tracked ensuring process adherence and timely deliveries.

## Unsurpassed Quality

Future Products commitment to quality and detail is the foundation of our entire manufacturing process. We are an ISO 9001:2000 certified company utilizing its elements as the guiding force behind our business.

Future Products maintains an isolated climate control inspection department for analyzing the

integrity and accuracy of your tooling.

We have the latest technology in computerized coordinate measurement machines (C.M.M.) and supporting equipment to ensure a level of quality that sets new standards for accuracy.
