

DIE-SEPARATOR

MOST STANDARD DESIGNS ARE ALSO AVAILABLE IN ELECTRIC-HYDRAULIC AND AIR-OPERATED VERSIONS
**LEXCO DIE-SEPARATOR
 MODEL #DS-3005-40**

Lexco Corp. presents a low cost answer to the separation of tight-fitting heavy dies. This die-separator table is designed to handle dies weighing up to 4000 lbs. and with dimensions of up to 30" in width and 50" in length (minimum die size would be 6" x 9").

The maximum height of the die assembly that can be handled will vary in relation to the amount of separation that is required, but a 16" high die assembly is the approximate maximum height.

- MAXIMUM CAPACITY: 4000 lbs.
- TABLE LENGTH: 60"
- TABLE WIDTH: 30"
- TABLE LOW: 31"
- TABLE HIGH: 51"
- OVERALL HEIGHT: 79½" (maximum for door clearance)

The table will raise at the rate of approximately 0.24 inches per stroke with a foot lever effort of 96 lbs. maximum under full load.

WEIGHT OF TABLE AND ATTACHMENTS: 1372 lbs.

EQUIPPED WITH:

- (1) one hydraulic cylinder, foot-operated pump with overload and check valves, directional control valve, flow control lowering valve; and all connecting hoses and fittings.
- (2) built-in load stabilizer assembly, with guards at pinch-points.
- (3) four swivel 8" dia. steel casters.
- (4) four triple-telescoping guide tube assemblies.
- (5) two floor locks.
- (6) heavy-duty die-separator attachment for separating and rotating the punch holder (upper die assembly).
- (7) a hinged tow bar may be provided as an option at either or both ends.
