

ADVANCE™

**METALLOID CORPORATION
IS YOUR PARTNER IN
GREEN METALWORKING
FLUID TECHNOLOGY**

Metalloid tube forming lubricants fit the needs of manufacturers and fabricators of tubing working with seamless or seamed tube, ferrous or non-ferrous metals. Regardless of your tube diameter or wall thickness Metalloid Corporation has a lubricant to improve your process.

Our tube forming lubricants are biodegradable, heat treatable, easy to clean off and operator friendly. If you choose to *go green*, Metalloid's ADVANCE™ products are Botanical Based lubricants formulated with renewable resources produced in America. Our ADVANCE™ products are "oil-free" and friendly to people and the environment.

If you cut, bend, draw, expand, perforate or form tubes, let Metalloid be your partner in process improvement.

ADVANCE™ 6170 bends or draws stainless steel tubing. This product is great on heat exchangers, fuel lines, exhaust manifolds and boiler tubes.

ADVANCE™ 6230 bends, form, stamps and draws steel and aluminum tubing.

ADVANCE™ 6110 is ideal for cold drawing and rolling copper alloys.

ADVANCE™ 6120 is a heavy-duty lubricant ideal for any tube forming operation.

The above are just a few of the tube forming lubricants in our product line. **Contact Metalloid Corporation for more information about a tube forming lubricant for your specific application at 1-800-686-3201 or visit us on the web at www.metalloidcorp.com**
