

CLOZ-IT™

EJECTOR HOUSING COVER

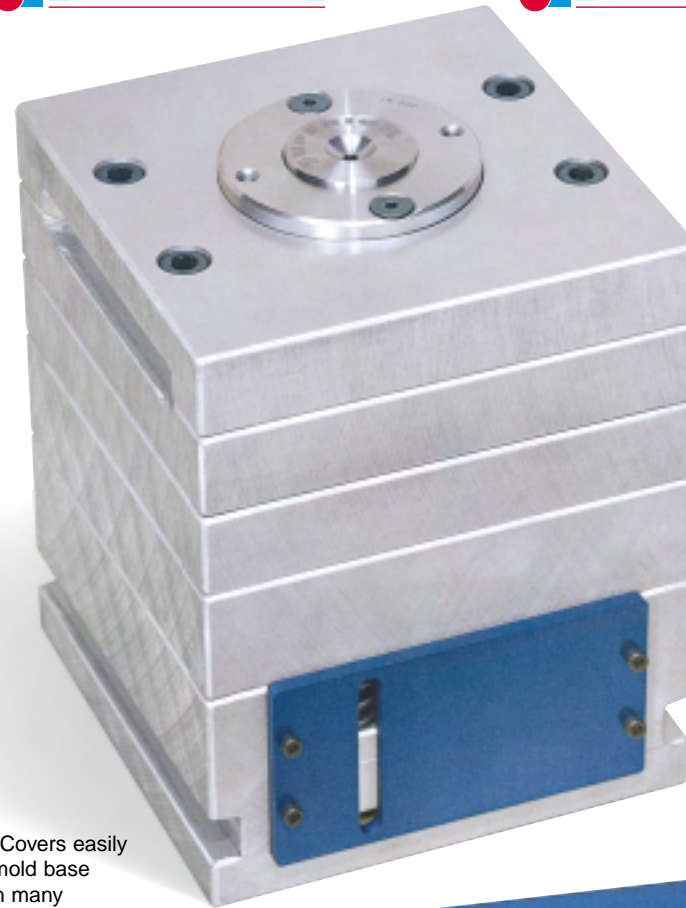

Cover all your bases with Cloz-It™

Superior's new Cloz-It™ Ejector Housing Cover is the perfect addition to your mold base to help eliminate hazardous pinch points and debris jamming in your ejector housing. Its durable anodized aluminum design is exclusive to Superior and resists corrosion. And don't worry about covering your ejector operations... Cloz-It™'s convenient viewport ensures you will be able to monitor the ejector and return spring for proper operation.

Each Cloz-It™ features an ejector viewport that shows ejector operating action and spring compression.

Cloz-It™ Ejector Housing Covers easily mount on most standard mold base widths and are available in many popular sizes.

When Ordering Please Specify:

1. Part Number
2. Quantity

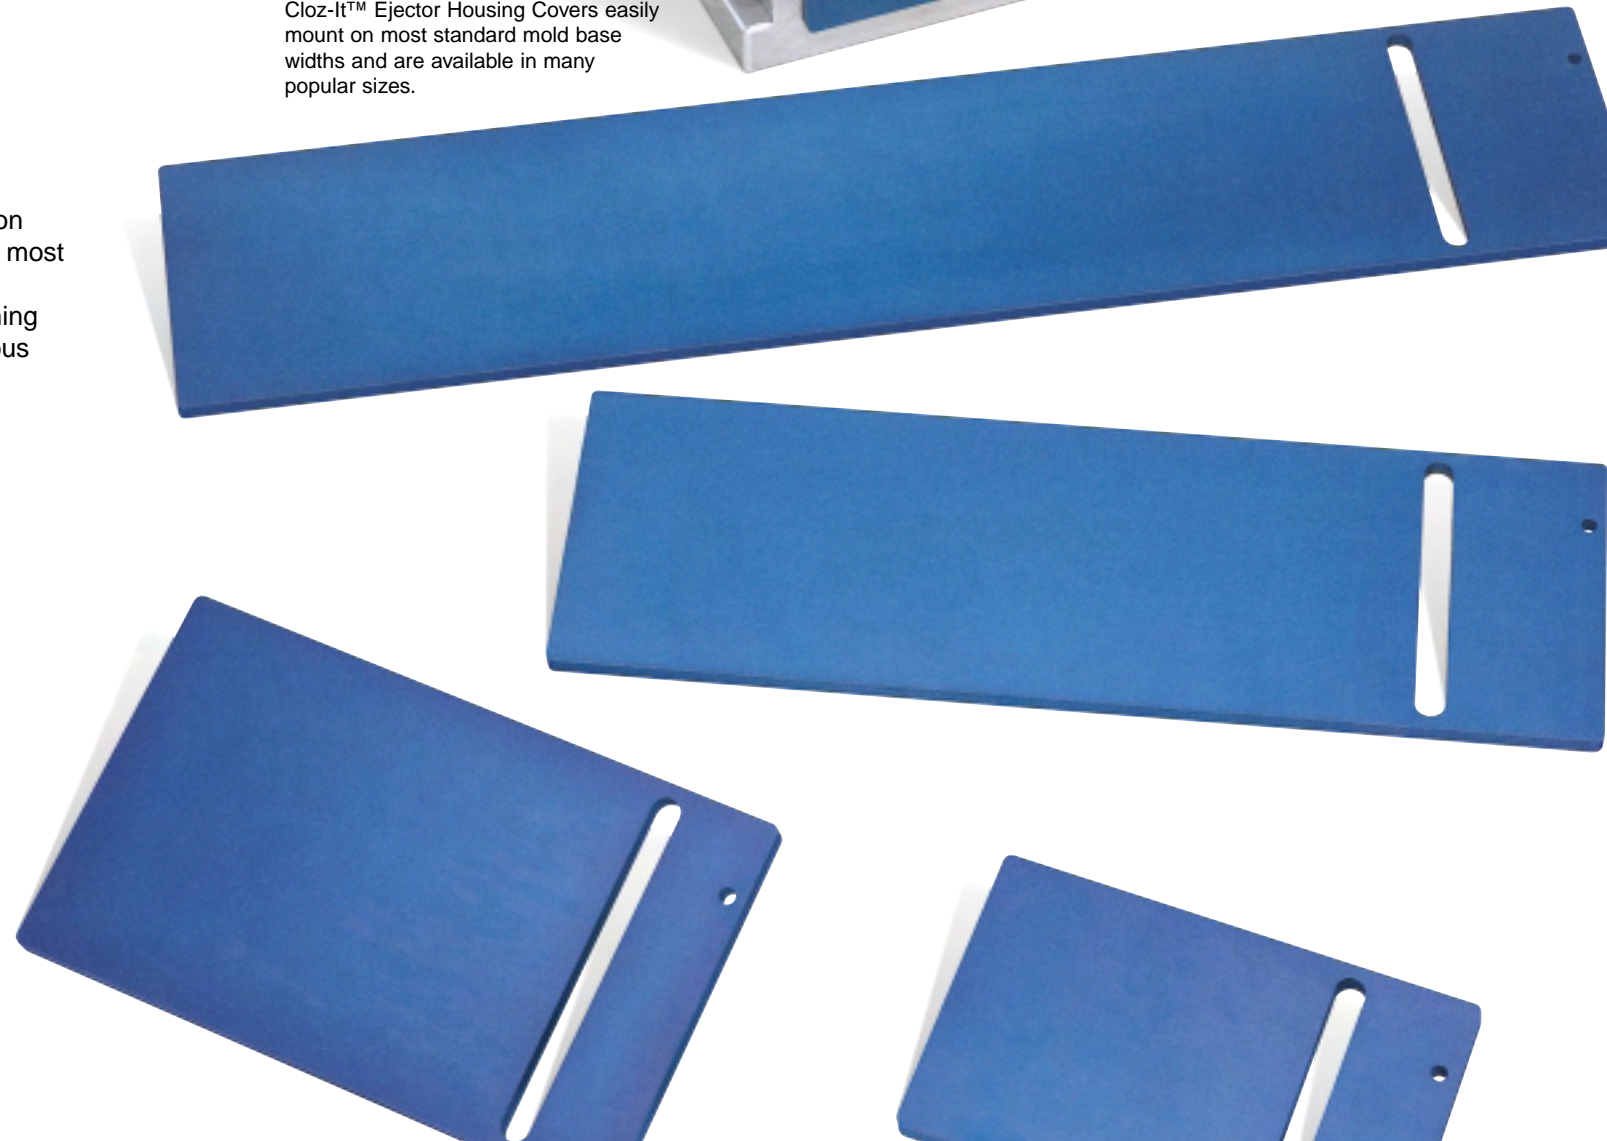

Selecting the proper Cloz-It™ is easy!

To determine the proper Cloz-It™ Ejector Housing Cover for your mold base simply find your mold base dimensions in the blue column and get your part number from the red column.

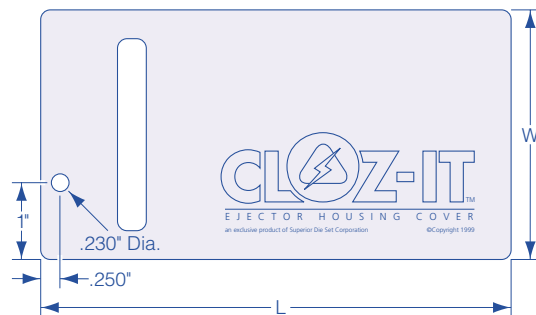

Make your mold base safer today!

Each Cloz-It™ Ejector Housing cover features:

1. Heavy-duty anodized aluminum construction
2. Ejector viewport for monitoring proper operation
3. Easy mounting system that is compatible with most existing and new mold bases
4. Exclusive design that keeps debris from jamming your ejector assembly and eliminates hazardous spring and plate pinch points

CLOZ-IT™ SIZING DATA

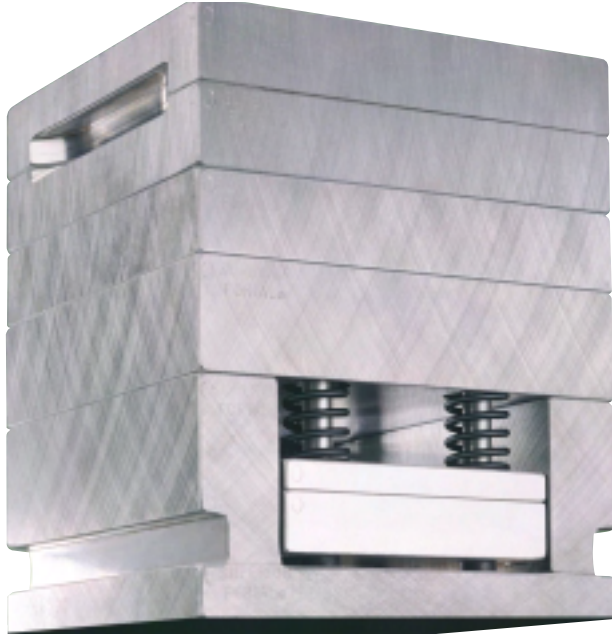

Cloz-It™ Ejector Housing Covers are manufactured of aluminum plate with one .230" mounting hole and ejector viewport standard. Additional mounting holes can be drilled by the customer. To select the appropriate size for your mold base is the "L and "W" dimensions that best fit your mold base. See the table at right for part numbers and specifications.

The Perfect, Low-Profile Return Spring for Mold Bases with Cloz-It™ Installations

Unlike ordinary die spring products, Superior's exclusive Return-Rite™ return springs are specially engineered to be smaller and more compact to take up less mold cavity area and not break through the plate edge. This reduces pinch points, debris jamming and gives the mold base an easy Cloz-It™ installation. Add a Cloz-It™ Ejector Housing Cover and you have a much safer and smaller mold base that costs less to operate and maintain.

Space Saving: You can use standard mold bases with Return-Rite™ because the springs have small cavity area footprints. There is no need to relocate return pins or buy bigger mold bases any more.

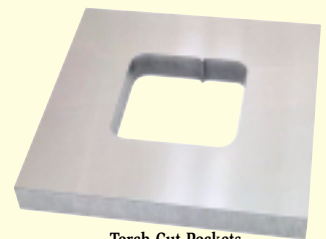

Safe Operation: Compact Return-Rite™ springs eliminate sharp edges and do not break through the plate edge where accidents are more likely to occur.

Superior manufactures this and several other exclusive components as well as a full line of complete or rough finished mold bases and die sets. Call today for your free catalog or visit our web site at <http://www.supdie.com>
