

VIBRO/DYNAMICS
vibration and shock isolation systems

**COMPANY
INFORMATION**

COMPANY PROFILE

Since 1964, Vibro/Dynamics Corporation has been the leader and pioneer in the design and manufacture of vibration isolation and machinery installation systems for the metal forming, metal cutting, forging, can making, die casting, plastics, and woodworking industries.

Our Products and Services are designed to effectively reduce transmitted shock and vibration and to provide a way to precisely level, align, and properly support industrial machinery.

No other isolator manufacturer offers a broader product line and the most solutions. Whether it's a heavy blanker or forging hammer disturbing the neighbors, or an injection molder or die caster that likes to walk, Vibro/Dynamics has the best solution for you!

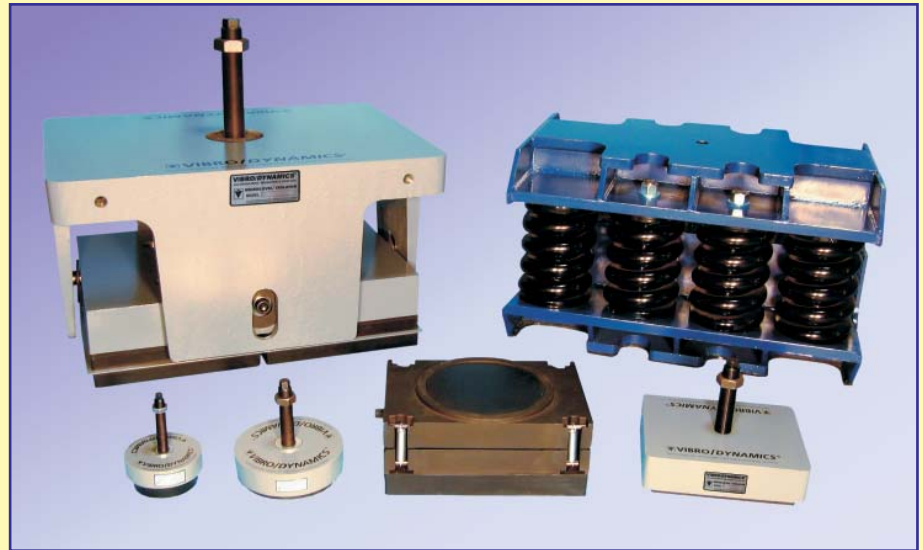

OUR COMMITMENT

Vibro/Dynamics provides high-quality products, responsive service, and technologically innovative solutions for our customers.

The commitment, desire, and ability of our personnel to design, engineer, manufacture, and supply valuable solutions to meet our customer needs is the foundation of our success, growth, and long-lasting customer satisfaction.

ISO 9001 CERTIFIED

Since 1997, Vibro/Dynamics Corporation has been unconditionally approved for ISO9001:2000 certification by ABS Quality Evaluations, Inc., Houston, Texas. We are very proud of our people and their effort in achieving this goal and maintaining this certification. We believe that this demonstrates our Company's commitment to quality and service.

PRODUCTS

- Micro/Level® Elastomer Isolators
- MRM Isolation Elements
- Viscous Damped Spring Mounts
- Wedge Isolators
- MX Press Isolation Systems
- Engineering Services

APPLICATIONS

Metal Forming

SINCE 1964

VIBRO/DYNAMICS

APPLICATIONS

Metalworking Presses

Mechanical and Hydraulic
Pneumatic and Screw Drive
Turret Punch
Gap Frame
Automotive Transfer
Motor Lamination
Forging Presses and Hammers

Precision Machine Tools

Machining Centers
Precision Grinders
Transfer Lines
Milling Machines
Broaching Machines
Wire EDM
Lathes
Cold Headers
Upsetters

Metal Container

End Conversion Presses
Shell and Cupping Presses
Bodymakers and Wall-Ironers
Necker Flangers
Decorators and Fillers

Diecast Machines

Plastic Molding

Injection Molders
Blow Molders
Die Cast Machines

Textile Machines

Knitting Machines
Weaving Machines
Weft Insertion
Carpet Tufters

Services

Vibration Measurement
Vibration Analysis
Design Engineering
MTS Dynamics Testing

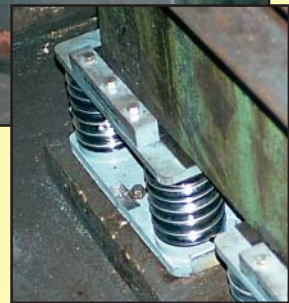

Others

Turbine Generators
Isolated Foundations
Construction Mounts
Transformers
Pumps

Metal Cutting

Forging Hammers

Technical Assistance

To assure the best installation, our application engineers will carefully analyze your particular application needs and recommend the proper isolator for the best installation. Please give us a call, and we will be happy to assist you in your selection.
